

## AMENDMENT

### Amendments to the Specification

Please insert the following at line 1 of page 1:

This application claims priority to PCT/DE 2003/009689, filed on September 1, 2003, the entire contents of which are hereby incorporated by reference.

Delete the following paragraph at line 22 of page 4:

~~Figure 7: GFP expression in murine lungs at day 2 after intranasal application of  $1 \times 10^4$  IU per mouse. (A) Lungs were removed and immediately scanned *in situ* for GFP expression. Magnification is 100 X. (B) Thin section of a mouse lung after shock freezing of lungs in liquid N<sub>2</sub>. Lungs were left unfixed and unstained to maintain GFP expression. The upper panel shows the light microscopy image of the view shown in the lower panel under the fluorescent microscope. Note the expression of GFP in cells of the bronchioli (arrowhead) and alveolae (arrow). Magnification is 200 X.~~
